Hey there, fairly new member here. I am hoping you all can assist me in a few questions about my 2010 A5. I bought this A5 in Jan with 93kmi. On my 200 mile trip home it burned through 1/2 quart of oil, or so I think. I was unsure if it was topped off to begin with. Anyhow, after burning through a quart every 700-1000 miles I brought it to Audi to have an oil consumption test.

The early version of the TFSI gasoline engines found in the A5, A4 and Q5 have an inherent design fault which leads to high consumption of oil.
