Add 1 value that is greater than 14 and 1 value that is less than 6 to the original data set. Add the two values, 50 and 100, to the original data set. Change the values so the distribution fits the description given to you by your teacher, then find the mean and median. Find another group that created a distribution with a different description.

“What width did you use for your histogram? Why?” (I used 5 because my data set has values ranging from 1 to 42. I could have used 10 but then I would have only had 5 bars.) “What is the appropriate measure of center for your data set?” (The median was appropriate because my data set has a skewed distribution.)
