Solution Packager for Microsoft

Dynamics CRM 2011 - CRM

I finally decided to spend some time on creating something new and I released Dependent Option Set Manager (DOSM), an updated version of my previous solution. Main reason of this release is the use of formContext instead of the old Xrm.Page, Unified Interface transaction is near (some customers are already using it) and it's nice to provide a fully supported version of the script.

Incident Management and Change Request
Management now use CRM 7.0 Web UI. I agree with

you, it looks really cool ☺☺ Regards, Raquel

Crm 2011 Solution Manager - old.dawnclinic.org

In CRM 2011 the reports are included in a solution, which means that they will all be deployed at once, and they will contain all of this information. This reduces the load on both the developers and the client, and is a way to better the synchronization across organizations. In CRM 4.0 plug-ins were deployed using the Plug-in Registration Tool.
