REEBOP GENETICS - BIOLOGY JUNCTION

You will simulate meiosis, fertilization, and then build your baby Reebop by decoding the alleles on the chromosomes. Some basic facts about Reebops: ● Reebops have 8 homologous chromosome pairs, each with one trait. ● The 8th chromosome is a sex chromosome. It determine the sex of the baby and carries the gene for eye type.

using the "Key to Reebop traits". Write your answers on the data table. 7. Place all paper strips from your baby (chromosomes) back in the correct envelope. Go to the supply table to get the supplies you need to create your Reebop Baby. 8. Construct your baby. Then, draw a picture of your Reebop in the box under observations. 9.

Reebop Genetics Answer Key

Inheritance and variation are two key observations on which the theory of evolution by natural selection is based. You can develop this model of inheritance to show how a population of Reebops could change over successive generations – how it could evolve – if you generate rules to model the advantage that could be

conferred on individuals by different characteristics.
